This activity is covered in STANAG 4686. The objective of this meeting was to further define the methodology for assigning performance leveling to Active Protection Systems for the purpose of future selection by our NATO allies. The Team of Experts is comprised of designated Government officials from each participating nation.

Unclassified NATO Meeting Held at OU INC

As APS are still a relatively new concept on the battlefield, there are no well-established or broadly accepted safety standards for them to be tested against. There is NATO STANAG 4686, which looks at the performance levels of defensive aid suites on armoured vehicles, but some APS providers are critical of the standard.
